

Sunfish

(Mola alexandrini)

Sunfish, or mola, is the heaviest bony fish in the world. As foragers, they help maintain jellyfish populations and the balance of our marine ecosystems. Tourists travel across the globe just to watch them swim at Nusa Penida Marine Protected Area. Let's protect them from extinction!

THREATS

Bycatch

Plastic pollution

Destructive fishing

Save our Ocean,
Protect our Future!

BENEFITS

Umbrella species

Control jellyfish populations

Sustainable ecotourism

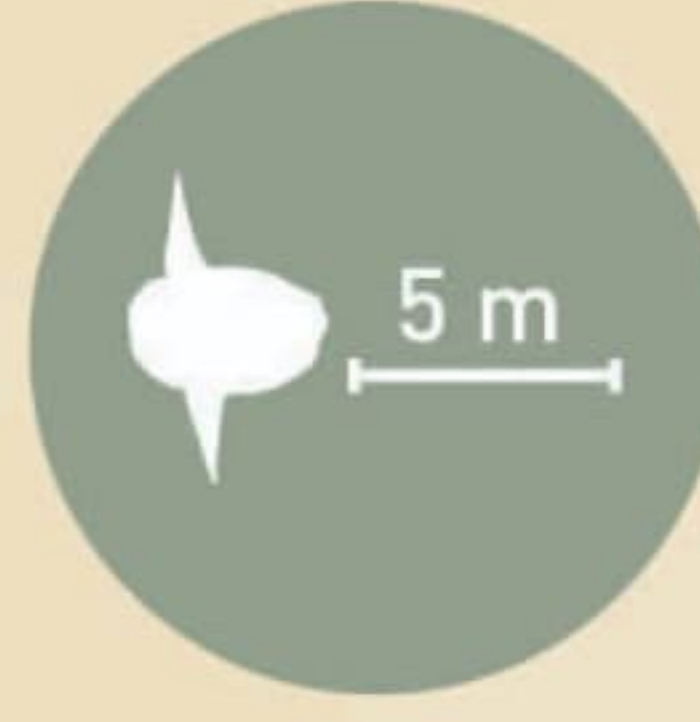

Growth of local economies

HOW YOU CAN HELP

Stop plastic pollution

Stay at least 5 meters away

Read the code of conduct
